Unpack and Inspect

NOTE: Returns are only accepted in original packaging used for shipping. Use caution so as not to damage cardboard crate or its wooden pallet. Do not dispose of shipping material until installation is complete. Please visit our website, www.ellasbubbles.com for complete details of return/exchange policy.

Move your Ella Walk in Bath

WARNING: Do not carry the walk in tub by the panels. Be careful when carrying the tub, avoid front panel contact with the floor or stairs to prevent damages. Make sure no loose parts are hanging down. Remove all four (4) access panels before carrying the tub to prevent them from falling out and breaking.

WARNING : Lift and carry the tub only by the frame. Protect the bottom of the tub to avoid breaking the shell.

Important Safety Instructions

WARNING:

Read through the entire manual completely before beginning installation.

Contract a licensed plumber for installation. Be sure you and your contractor are aware and follow all local plumbing codes. Your Ella Walk in Bath is not intended for outdoor use. Install the tub in accordance with the instructions in the manual. Use ONLY the parts and accessories provided or as recommended by the manufacturer.

CAUTION:

When using this product, basic precautions should always be followed. Read and follow all instructions.

DANGER:

Temperature in excess of 100.4 Fahrenheit (38 Celsius) may be harmful to your health. Check and adjust the temperature before use. Consult your physician before using your Ella Walk in Bath if you have a heart condition or other health issues. People using medications, herbal remedies, sleep aids, and/or having adverse medical history should consult a physician before using this product.

Pregnant women should NOT use this product before consulting their physician. Avoid the use of alcohol, drugs or other medications while using your walk in bath.

Be aware, hyperthermia is a risk when raising body temperature. Do not keep body submerged in heated bath for extended periods of time. The symptoms of hyperthermia include an increase in body temperature which can cause dizziness, lethargy, drowsiness and fainting. Avoid using the heated bath after strenuous activity.

Exercise caution while entering and exiting your Ella Walk in Bath.

Important Safety Instructions Continued

WARNING: To prevent stripping the PVC threads, DO NOT tighten with tools.

ONLY hand tighten the drain elbow.

Before Installation

Protecting the Bath

Cover and protect the bath shell and fixtures from scratches or other damages during the installation and tests. Remove the access panels when moving the Walk in Bath and always lift the bathtub from the frame (Page #2).

Water Test

Fill tub for a minimum of 20 minutes to test proper functionality before final in-wall installation to avoid unnecessary repairs or removal.

Drain and Plumbing

Make sure that the drain rough in has been placed at the proper location. The specifications and drawings shown below and on page #7 are for the Ella Deluxe (each model comes with separate specifications, please refer each model's specification). The dual drain can be connected with a "T" or "Y" connection into existing house drain. Proper materials must be used based on local plumbing code requirements.

NOTE: Flexible drains are not permitted in some areas. The customer and their contractor are responsible for using the appropriate solution to meet the current local construction and plumbing code requirements.

NOTE: Deluxe Model Shown
Specifications vary by model, please refer to the drawing that matches the model being installed.

Drain Elbow Options

Disclaimer:
In an effort to continually improve our product, specifications and configurations are subject to change without notice. Before ordering or installing, consider future access to essential equipment.

Preparing the Sub-floor

Prepare the sub-floor for the drain and ensure that the area is level. The supporting sub-floor must be able to support the total weight of the bathtub, bather and water.

Use a level and make sure that the sub-floor below the tub is leveled. If the floor is not perfectly level, adjust the appropriate leveling legs to re-align the tub to perfect level. It is important that all of the leveling legs are completely supporting the tub (touching the floor with equal weight distribution) and the tub is leveled for the door seal to work properly. If the tub is not perfectly leveled, it could result in water leakage and void the warranty.

Disclaimer:
In an effort to continually improve our product, specifications and configurations are subject to change without notice. Before ordering or installing, consider future access to essential equipment.

NOTE: Drawing above shows frame layout for Deluxe walk in bath. The Companion, Elite, Petite and Royal frame and drain layouts may vary. Please refer to the appropriate specification drawings for proper drain locations. Adjust the legs and lower the bath to within 1/16th of an inch above the floor or tile. Seal with white silicone or caulking if appropriate. If the sub-floor does not support the total weight of the bath, bather and the water, it can result in warping of the shell, misalignment of the door and/or create leaks and damages to the building structure.

It is the responsibility of the installer or owner to provide access for service required, per code. Ella is not responsible for any costs related to obtaining access for repair. The owner shall assume responsibility for such costs, and if appropriate, must seek recovery from the installer.

Do not insulate around the tub equipment. The tub, frame and all parts have been engineered to provide the proper ventilation.

Door Seal

Please keep in mind that the door has been closed for an extended period of time throughout shipping and the bathtub has been stored in various temperatures. It is possible for the silicone seal to stick to the frame when stored for extended periods of time. When the bathtub is received, the door seal should be checked for deformations from shipping and re-formed and adjusted where necessary. To restore the door seal, the seal must be released and allowed to relax with the door open. This is done by squeezing the seal with your finger tips and pulling it away from the door frame to regain its flexibility and original form. It is recommended that the door be kept open when not in use to increase the lifetime of the door seal and maintain its flexibility.

Installation of Deck Mount Grab Bar

- Parts List: Chrome grab bar x (1)
Escutcheon x (2)
Rubber washers x (4)
Metal washers x (2)
Bolts x (2)

To install the supplied grab bar first locate all the parts needed for installation. See drawing shown above. Ready the bolt assembly by first placing a metal washer onto the bolt followed by a rubber washer. Feed the bolt up through the tub shell and place another rubber washer over the extruded bolt followed by the escutcheon. You may start the threading into the grab bar to hold the assembly loosely in position and then repeat the process for the second bolt. Once the entire assembly is in place, tighten the bolts with the supplied Allen wrench.

WARNING: Under no circumstances install the grab bar without the large metal washer underneath the tub shell. Doing so will leave the tub shell vulnerable to cracking and **void the warranty.**

Installing Extension Kits

Deluxe Dimensions: 5"W x 29 1/2"L x 37"H
 Elite Dimensions: 7"W x 29 3/4"L x 37 3/4"H
 Royal Dimensions: 7"W x 31 3/4"L x 37 3/4"H
 Petite Dimensions: 7"W x 27 2/4"L x 37 3/4"H

L" Stainless Steel Brackets	Qty (3)
L" Acrylic Bracket	Qty (1)
1" x 1/8" Bolts	Qty (7)
1" x 1/4" Bolts	Qty (7)
1" Screw	Qty (1)
1/2" Nuts	Qty (9)
3/8" Nuts	Qty (7)
Medium Washers	Qty (14)
Small Washers	Qty (14)
Plastic Washer	Qty (1)
Plastic Cap	Qty (1)

1. Install 3 extension support brackets provides in the kit.
2. Clamp in place, the extension panel to the walk in tub shell, lining up the facade of top and front.
3. Pre-drill (+3/8") slightly wider holes than mounting screws to allow for final adjustment to the panel.
4. Mount extension with 7 screws, washers and bolts.
5. Apply Silicone or white caulking as needed.

The extension kit can be installed as needed. Opening can be filled as desired.

After all of the water and electrical testing is completed and all fixtures are checked, the tub can be installed to the surrounding wall or walls. Ella Walk in Baths come with low rise tile flange which allows for two or one wall installations. The extension panel of the bathtub can be installed as needed for 60" openings.

The tub can be finished and tiled over as shown in images. Caulking must be applied to joints as needed after the bathtub is installed.

Threshold Lowering Option

Lowering the threshold is an option that can be chosen during installation. Because your Ella Walk in Bath is set up for easy installation, lowering the threshold requires the drain option to be set up below the floor (Page #6). To lower the Walk in Bath threshold; First, remove the toe kick panel to expose the adjustable leg supports. Adjust the height of the tub while keeping the Walk in Bath plumb level on all four corners. Finish the installation with baseboard.

Lowered Threshold

Baseboard On (not supplied)

NOTE: Any alterations or installed additions are the responsibility of the installer. Ella Accessible Bathrooms is not responsible for any damage to the unit or for water damage, which could occur due to improper installation.

1. Draining the Walk in Bath:

To drain your Ella Walk in Bath, turn the drain opening clockwise from the down position, upward one half until fully open. Remain in the tub until the water has dropped below the door sill.

2. Exiting the Bath:

Getting out of your Ella Walk in Bath is as easy as getting into it. Wait for the water to drain below the door sill. Unlock the door by using the door handle. Fully open the door first then stand up and exit your Ella Walk in Bath.

NOTE: It is recommended to leave the door fully open when not in use to keep the door sealed fresh and to promote a longer lifetime for the door seal.

3. Using the Door:

Entering the walk in bath, the door can be closed and locked with the handle from a seated or standing position. Do not apply any body weight on the door when entering or exiting the walk in bath. The door hinges are well built and are very durable, however leaning on or applying weight on the door may damage and mis-align the door and create leaks. Such damages are not covered by the warranty. It is recommended to leave the door in the open position when the tub is not used to extend the life of the seal.
